During the first nine months of the FYE March 2015 ended December 31, the Japanese economy was impacted by the consumption tax rate hike. However, the economy achieved mild recovery thanks to improved employment and wages. On the other hand, consumer consumption was down. This trend was caused by poor weather during the summer months as well as stagnant consumer spending that has slowed as wage increases failed to keep up with the rising cost of living.

The Meiji Group entered into the final year of TAKE OFF 14, the Group's Medium-Term Business Plan ending March 2015. During FYE March 2015, we are strengthening and expanding existing businesses, fostering growth businesses, and improving profitability based on our priority theme of higher profitability and strategic investments for future growth.

In the Food segment, we focused on structural reforms and diligent cost reduction efforts in our Dairy, Confectionery, and Healthcare and Nutritionals businesses in order to combat increasing procurement costs for raw materials and energy.

In the Pharmaceuticals segment, we progressed with our Specialty and Generics strategy as we promoted our ethical pharmaceuticals products and reduce costs at domestic and overseas production bases.

These factors resulted in net sales of 868,789 million yen (up 0.7%, year on year), operating income of 42,940 million yen (up 35.5%, year on year), ordinary income of 44,997 million yen (up 30.9%, year on year), net income of 29,565 million yen (up 55.4%, year on year) during the first nine months of FYE March 2015.

2. Summary Information (Notes)

(1) Transfer of Significant Subsidiaries during the Current Quarter under Review Not applicable.

(2) Adoption of Special Accounting Methods for Preparation of Quarterly Consolidated Financial Statements

Tax expenses are calculated by rationally estimating the effective tax rate after application of tax effect accounting to income before income taxes for the consolidated fiscal year, which includes the current quarter under review, then multiplying income before income taxes by the estimated effective tax rate.

Income taxes-deferred are shown included in income taxes.

(3) Changes in Accounting Policy, Changes in Accounting Estimates, and Retrospective Restatements Changes in Accounting Policy

(Application of accounting standards related to retirement benefits)

Beginning from the first three months of the current consolidated fiscal year, the Group adopted the provisions of Paragraph 35 of the Accounting Standard for Retirement Benefits and Paragraph 67 of the Guidance on Accounting Standard for Retirement Benefits (ASBJ Statement No.26, May 17, 2012) and the Guidance on Accounting Standard for Retirement Benefits (ASBJ Guidance No. 25, May 17, 2012). Under this new accounting policy, the Group has revised its method of calculating retirement benefit obligations and service costs. The Group has replaced the straight-line attribution basis with the benefit formula basis for the method of attributing expected benefit to periods.

In accordance with the transitional application as provided in Paragraph 37 of the Accounting Standard for Retirement Benefits, beginning with the start of the first six months of the current consolidated fiscal year, the Group has taken the effects of the changes in calculation method for retirement benefit obligations and service costs directly to retained earnings.

As a result, assets related to retirement benefits as of the beginning of the first nine months of the current consolidated fiscal year increased by 174 million yen, liabilities related to retirement benefits increased by 1,428 million yen, and retained earnings decreased by 791 million yen. Furthermore, the impact of these changes on income is expected to be minor.
