The Japanese economy during the first three months of FYE March 2018 transitioned on a mild recovery trend. We saw continued improvement in the hiring environment as well as improved consumer spending and capital expenditures. Although economic growth is expected to continue, it remains necessary to pay attention to overseas economic trends and their impact on the Japanese economy.

Amid such conditions, the Meiji Group entered the final year of STEP UP 17, the Group's Medium-Term Business Plan. Based on our core policy of Accelerating growth and achieving further improvement in profitability, we promote our growth strategy aimed at increasing corporate value. These initiatives include Strengthening priority businesses and taking on the challenge of future growth, Improving profitability to withstand harsh economic environments, Pursuing global expansion, and Evolving our management system.

In the food segment, we are working towards steady growth amid expectations that we will see increases in raw material procurement costs due to fluctuations in currency markets and raw material markets. We will continue to grow our core products while working to optimize production, distribution, and sales as well as cost reductions.
In the pharmaceutical business, despite ongoing discussion regarding fundamental reforms to the NHI pricing system creating an environment in which predicting business has become more difficult, we are concentrating management resources on the core domains of anti-infective drugs and CNS agents as we work to maximize sales and profits. Also, Me Pharma Co., Ltd, which we established in December 2016, will create a new business model to expand the generic pharmaceutical business.

These factors resulted in net sales of JPY 301,334 million (up $0.1 \%$, year on year), operating income of JPY 24,422 million (up $10.8 \%$, year on year), ordinary income of JPY 25,163 million (up $15.2 \%$, year on year) during the first three month of FYE March 2018.
