## 1. Qualitative Information

(1) Explanation Concerning Operating Results

Meiji group entered the inaugural year of Medium-Term Business Plan for FYE March 2019-2021. Based on our basic concept of Address strategic issues continuously and Challenge for the further growth, we began to promote our growth strategy for Expand share and achieve high revenues in core businesses, Expand aggressively in overseas markets and establish growth platform, Propose new value in health care domain, Continue structural reforms and resolve specific business issues in each business, and Enhance Meiji Group management platform and promote CSR.

During the FYE March 2019, we will expand sales by focusing management resources on core segments and growth segments both in the food and pharmaceutical domains as we work towards the goals of our 2020 Medium-Term Business Plan. At the same time, we will aggressively expand business in overseas markets. Market conditions are difficult in both segments. The food segment faces rising logistics and personnel expenses while the pharmaceutical segment is severely impacted by NHI pricing revisions. Amid such environments, we will manage expenditure effectively and improve productivity.

These factors resulted in net sales of JPY 296.394 billion (down $1.6 \%$, year on year), operating income of JPY 19.774 billion (down $19.0 \%$, year on year), and ordinary income of JPY 20.311 billion (down $19.3 \%$, year on year) during the first three months of fiscal year ending March 2019. Net income attributable to shareholders of parent company was JPY 17.090 billion (up $0.5 \%$, year on year).

On July 2, 2018, Meiji Holdings and our subsidiary Meiji Seika Pharma Co., Ltd. ("Meiji Seika Pharma) completed the acquisition of part of the shares of KM Biologics Co., Ltd., ("KM Biologics") which was established via a contribution in kind transaction, with The Chemo-Sero-Therapeutic Research Institute ("Kaketsuken"). Through this transaction, the major businesses of Kaketsuken are transferred to KM Biologics. Thus KM Biologics became a consolidated subsidiary of Meiji Holdings.

(Adoption of Special Accounting Methods for Preparation of Quarterly Consolidated Financial Statements)
Tax expenses are calculated by rationally estimating the effective tax rate after application of tax effect accounting to income before income taxes for the consolidated fiscal year, which includes the current quarter under review, then multiplying income before income taxes by the estimated effective tax rate.
Income taxes-deferred are shown included in income taxes.

## (Changes in Accounting Policy)

(Change in accounting policies with unclear distinction from change in accounting estimates)
(Change in depreciation method for tangible fixed assets)
As of the first quarter of the current consolidated fiscal year, we changed to the use of the straight-line method as the method of depreciation for the tangible fixed assets of the manufacturing plants of confectionery products, etc. in the food segment and its domestic consolidated subsidiaries. In the past, the declining balance method was adopted except buildings acquired on or after April 1, 1998 and building accessories and structures acquired on or after April 1, 2016.

During the 2020 Medium-Term Business Plan for FYE March 2019-2021, the first stage of our 2026 vision, we will expand our market share and increase profit in our core business. For example, market for health conscious chocolate is expanding and we have high competitive advantage in the market. Therefore we concentrate management resources on core business and set up the plan for capital investment. After we examined the operation status of production facilities, we estimated we can operate our facilities stably for longer period. Accordingly we believe applying straight-line method is appropriate for our future business.
As a result of this change, compared to the previous method, operating income, ordinary income, and net income before income taxes for the first three months of the current fiscal year increased by JPY 902 million, respectively.
(Additional information)
(Application of the Partial Revisions to Accounting Standards for Tax Effect Accounting)
We apply the Partial Revisions to Accounting Standards for Tax Effect Accounting (Corporate Accounting Standards No. 28, February 16, 2018) as of the first three months of the current consolidated accounting period. As such, deferred tax assets are indicated under Investments and other assets, and deferred tax liabilities are indicated under fixed liabilities.
