

### The raw milk procurement area list

We recognize the environmental and social negative impacts of our raw milk supply chain and seek to enhance the resilience of our supply chain by addressing potential or actual risk. We sourced 1.2 million tons volume of raw milk in FYE 3/2023. We source our raw milk from 18 of Tier 1 suppliers and they are connected to approximately 9,000 producers in our raw milk origins. The table below shows the countries and regions where the producers are located. The information is based on internal information about procurement and public statistics. Please note that it is a snapshot result at the time of the survey, it includes producers who may be potentially involved in our supply chain, and it changes depending on our procurement strategy at that time.

Raw milk procurement area as of March 2023	
Japan	Hokkaido
	Aomori
	Iwate
	Miyagi
	Ibaraki
	Tochigi
	Gunma
